Class Work – Assignment - 1

Spring Boot Task: 5 - Page Website

Objective

Create a simple **5-page website using Spring Boot** where students can open the website in a browser and navigate between different pages.

Thymeleaf, JPA, and Database are not required.

Technologies

- Java
- Spring Boot
- Spring Web
- HTML
- CSS
- Browser

Required Pages

The website must contain these **5 pages**:

1. Home Page

URL:

```
http://localhost:8080/
```

Content:

- Website/project name
- Welcome message
- Short project introduction
- Navigation menu

Example:

```
STUDENT MANAGEMENT SYSTEM

Welcome to our Student Management System.

This project is developed using Spring Boot.

Home | Project Creator | Product | Features | Contact
```

---

2. Project Creator Page

URL:

```
http://localhost:8080/about.html
```

Display information about the student who created the project.

Include:

- Name
- College
- Course
- Year
- Skills
- Short introduction

Example:

```
ABOUT PROJECT CREATOR

Name: Rahul Kumar
Course: B.Tech Computer Science
College: ABC Engineering College
Year: 3rd Year

Skills:
Java
Spring Boot
HTML
CSS
MySQL
```

---

3. Product Page

URL:

```
http://localhost:8080/product.html
```

Display information about the product/project.

Include:

- Product name
- Description
- Purpose
- Technologies used
- Target users

Example:

```
PRODUCT INFORMATION

Product Name:
Student Management System

Description:
A simple web application for managing
student information.

Technologies:
Java
Spring Boot
HTML
CSS

Target Users:
Students
Teachers
Colleges
```

---

4. Features Page

URL:

```
http://localhost:8080/features.html
```

Display the main features.

Example:

```
PROJECT FEATURES

✓ Add Student
✓ View Student
✓ Update Student
✓ Delete Student
✓ Search Student
✓ Student Reports
```

---

5. Contact Page

URL:

```
http://localhost:8080/contact.html
```

Display:

- Creator name
- Email
- Phone
- College
- Location

Example:

```
CONTACT

Project Creator: Rahul Kumar

Email: rahul@example.com
Phone: 9876543210

College:
ABC Engineering College

Location:
Agra, Uttar Pradesh
```

Project Structure

Since we are **not using Thymeleaf**, the HTML files can be placed inside:

```
src/main/resources/static/
```

The project structure will be:

```
spring-boot-web-project
│
├── src
│   └── main
│       ├── java
│       │   └── com.example
│       │       └── SpringBootWebApplication.java
│       │
│       └── resources
│           └── static
│               ├── index.html
│               ├── about.html
│               ├── product.html
│               ├── features.html
│               ├── contact.html
│               └── css
│                   └── style.css
│
└── pom.xml
```
